SKILLS

- Technical main skills: **NodeJS, Expressjs, NestJS, JavaScript, MySQL, MongoDB**
- Technical additional skills: **ReactJS, Tailwind, Hook, Redux**
- Soft skills: **Teamwork**

EDUCATION

FPT Polytechnic college (03/2022 - 09/2024)

GPA: 3.68

AWARDS: Top 100 excellent students, FPT Polytechnic college (2022 - 2023 - 2024)

PROJECTS

Powerkeentrend (10/2024 - Present) Back-end developer	
Team Size	2
Position	Back-end Developer
Project Summary	E-commerce website selling hair wax
Responsibility	• Developed and optimized APIs using NestJS to manage products, orders, and users. • Designed and implemented MySQL database schema with Prisma ORM, optimizing relationships between products, categories, and orders. • Built secure user authentication and authorization workflows with JWT, supporting role-based access control (super-admin, management, customer). • Integrated Cloudinary for product image storage and processing. • Implemented a background email processing system using Redis and BullMQ to ensure efficient email delivery • Build a cms system to manage products, product categories, orders, and users
Technologies	• NestJS, Redis, BullMq, Sequelize ORM, MySQL
Demo	• Website: https://powerkeentrend.com • Api: https://powerkeentrend.com/api-docs

DevBook (05/2024 – 09/2024) Full-stack developer	
Team Size	5
Position	Full-stack Developer
Project Summary	A social media platform enabling users to connect, share posts, and communicate through messaging.
Responsibility	- Designed and developed messaging APIs using Node.js and Express.js, supporting real-time interactions with Socket.IO. - Designed MySQL database schema with Sequelize ORM to manage users, messages, and media efficiently. - Built features for online/offline user status and integrated media handling for images and videos. - Implemented WebRTC for video calling functionality and integrated with the messaging system. - Secured API endpoints with JWT and ensured reliable media storage using Cloudinary.
Technologies	- Back-end: Node.js, ExpressJS, Sequelize ORM. - Front-end: React.js, Zustand ... - Database: MySQL - Real-time Features: Socket.IO, WebRTC - Others: JWT, Cloudinary (media storage).

Book Review Website (10/2024 – 12/2024) Full-stack developer	
Team Size	1
Position	Full-stack Developer

Project Summary	A platform for book enthusiasts to explore reviews before making purchase decisions.
Responsibilities	• Developed back-end using Node.js and Express.js, providing RESTful APIs for core functionalities like user authentication, product management, and reviews. • Designed and optimized the MySQL database schema to manage products, categories, reviews, and users efficiently. • Implemented secure authentication and authorization with JWT, supporting role-based access for admins and users. • Built a CMS for managing books, categories, user comments, and reviews. • Integrated Cloudinary for handling image uploads and storage.
Technologies	• Back-end: Express.js, Mysql2 • Front-end: React.js, Redux • Database: MySql
Demo	• Website: https://bookstore-frontend-wheat.vercel.app • API: https://bookstore-backend-5eas.onrender.com/api-docs/

Chat App (05/2024 – 06/2024) Full-stack developer	
Team Size	1
Position	Full-stack Developer
Project Summary	Provides a real-time messaging platform.
Responsibilities	• Developed RESTful APIs with Node.js and Express.js for user registration, authentication, and message management. • Integrated Socket.IO to enable real-time messaging,

	supporting text and image messages. • Designed a MongoDB database schema with Mongoose to optimize storage for messages and user statuses. • Secured user data with JWT-based authentication workflows.
Technologies	• Front-end: React.js, Redux, Axios, Socket.IO ... • Back-end: Express.js, Mongoose • Database: MongoDB
Demo	• Website: https://chat-app-fe-green.vercel.app/ • API: https://chat-app-be-17fu.onrender.com/api-docs
